

# SUGGESTIONS

## ELEVATE STORAGE

Create a solution that suits your needs. Start with the Elevate frame and build your storage up.

Here are a few suggested configurations. You could even play with colours and stack a combination of wood grain or solid colour storage units for a unique look.

It is not recommended to go higher than 4 levels of storage without securing it to a wall.

### GUIDE LINES

Always start with the Elevate frame and build your storage up.

The base of each storage unit is pre-drilled and fitted with plastic grommets. Use the screws that accompanies the storage to fasten the storage unit to the frame.

Inside each storage unit, on the underside of the top, are 1mm pilot holes so that once all the units are stacked they can be fixed in place with the screws supplied.

ELEVATE DESK LEG

Create side storage for an Evolution single desk. The Evolution leg frame, with one side short enough to rest on a elevate storage unit (570 high)

50 x 900 x 700 LHS 712 159 019  
50 x 900 x 700 RHS 712 159 020
